

Activity

- 1) Go to <https://openweathermap.org/> and Sign up for an account
- 2) When you finish the signup, you will get APP-ID

The screenshot shows the 'API keys' management interface on the OpenWeatherMap website. At the top, there's a navigation bar with links: Setup, API keys (active), My Services, My Payments, Billing plans, Map editor, Block logs, History bulk, and a Logout button. A blue informational banner states: 'Activation of an API key for Free and Startup accounts takes 10 minutes. For other accounts it takes from 10 to 60 minutes. You can generate as many API keys as needed for your subscription. We accumulate the total load from all of them.' Below this, there's a table with columns 'Key', 'Name', and 'Create key'. The first row shows a key 'd75b8286c6ff5f316727f9f6325e90a0' with the name 'Default' and a 'Create key' button. A label '* Name' is visible at the bottom right of the table area.

Key	Name	Create key
d75b8286c6ff5f316727f9f6325e90a0	Default	

* Name

- 3) Add the APP-ID to the Activity3.
